Languages	C, C++, Java
Other	Spring 5.0, Full Stack Website Development,Spring Boot, Spring Rest, BDD, UI/UX Design and MS Office

Functional

Management and Leadership Skills	Project Management

Projects

(FLP Project) Cap Store   **(Duration) 10 Days**

(Role) Team Leader   *Training Project*

This project is an E-commerce website where customer can do online shopping. It involves three major roles admin, merchant and customer. Admin is responsible for this E-commerce site. Merchants can sell their products by adding the products to the site by logging into their account. Customers can view all the products and can do online shopping by logging into their account. It has many modules where our team developed managing cart, getting transaction details, transaction processing, checking & updating status of delivery modules.
I handled Managing Cart module and Getting transaction details module both frontend and backend.

Managing Cart Module:

I am responsible for designing the cart page front end part and I also worked on back end part which involves adding, deleting and updating the products in the database and the status will get updated as ' added to cart' or 'bought directly' according to the button he/she clicks..

Getting transaction details:

In this module, I have worked on designing the front end part of payment page which prompt the customer to select the mode of   payment and to enter account details. In the back end details retrieved from payment page will be added to transaction table and the mode of purchase will be updated according to the mode which the customer selects i.e., card based, online banking and cash on delivery.

Environment: : Java 8, Spring boot 2.0.4, Rest API and MySql 5.5

Technologies used : HTML, CSS, Javascript, JSPand Bootstrap

Project-2:

(Role) Software Engineer   *(Duration) 5 months*

This project was related to application maintenance. My role in this project was to look at Internet Banking customer issues. My task is to analyze the issue faced by the customer at the back end by finding the issue in the logs and also we will analyze the error codes to fix the issue at the back end side and also we will monitor IB by using Grafana from end to end basis which gives the clear picture of issues going in IB. Other than these things, I also work on Change request, Restart/Reboot, PEP.

Environment: Java 8, Unix, SQL.

Training

JEE full stack Capgemini FLP training

Certifications

Oracle Certified Associate

Education

Gokaraju Rangaraju Institute of Engineering and Technology, B.Tech in Information Technology, 2018

Professional Organizations
